Making a difference for tomorrow, today!

Mesa County Solid Waste Management team has partnered with the Mesa County Fair as a Fair Sponsor.

Promoting a partnership to “Reduce-Reuse-Recycle”

This is an awareness for our environment and our impact on landfills.

- Did you know that, when used with food products, especially when heated, **Styrofoam** releases toxic chemicals into the food causing a contamination which **can** be hazardous to your health?
- Did you also know that when Styrofoam is exposed to sunlight it creates harmful air pollutants which can contaminate **landfills** and deplete the ozone layer?
- Did you know that decomposing of Styrofoam can take as many as 500 years ?

As a food or beverage vendor, you can help by committing to eliminate **Styrofoam** from your drink or food services. If you choose to use alternative products that are reusable or recyclable for your service, the Mesa County Solid Waste team will cover \$100 of your vendor fee.

That’s right; Mesa County Solid Waste will cover

\$100 of your vendor fees!

If you agree to use other methods such as plastic bottles, cans, paper plates and paper container for your food service, instead of Styrofoam, this is an alternative that pays.

We all need to do our part in preserving our environment for future generations.
